If we can ship it,
we can build it.

Design & Manufacturing

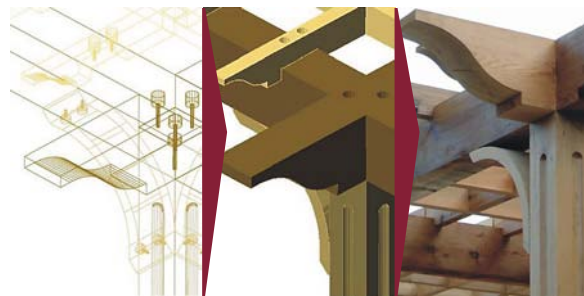

Our design and engineering staff includes in-house **registered engineers** with seals for all of New England.

Our comprehensive approach gives you the advantage of a **cohesive component design** package.

You will have greater project flexibility because our **multiple product offerings** are supported by a highly capable and innovative design and engineering staff.

Precise custom design with 3D CAD software provides you with a computer generated preview of your project.

Preliminary viewer files can be sent for you to review a 3D model of your custom project.

**Set Apart From the Competition
by Excellence in Sales, Service,
Design, and Production**

Your projects will be “in budget” with our competitive prices and **“on schedule”** with our higher quality and more feature-rich products that make site work move quickly.

Our expert designers and engineers can design whatever you can imagine for your project. Our state-of-the-art manufacturing facilities will produce your components accurately and we'll deliver them on schedule.

Reliable Truss and Components, Inc. is a division of National Lumber Company. With the infrastructure of National Lumber and the expertise of Reliable Truss, you will be assured of receiving the best products and services.

Visit our website for more detailed information about our capabilities.

Contact us today to discuss your current or future projects.

Design & Manufacturing

Prefabricated Custom Structures

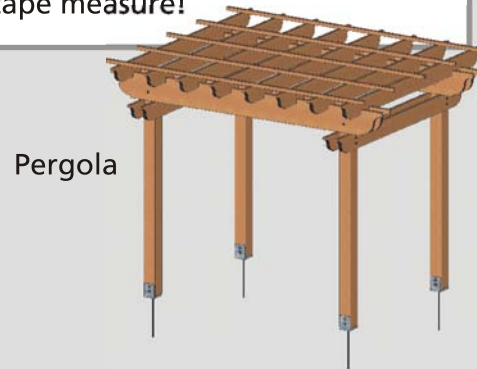

Cupolas, Dormers, Porticos:

- Rough Framed or Finished
- Finish Options:
 - Trim, Siding and Windows
 - Roofing (Cupolas Only)
 - Weathervane/Finial
- Small or Large
- Taller and larger cupolas may ship in pieces for onsite assembly.

Pergolas:

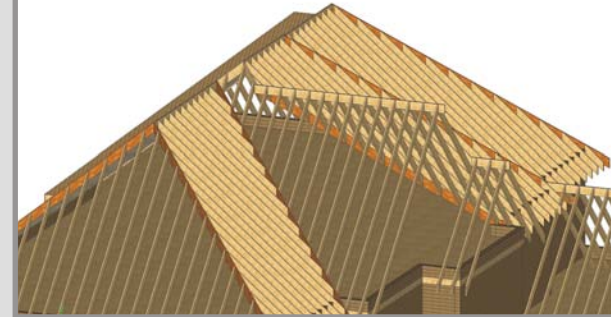

- Precut and drilled for easy assembly
- Shipped as a kit with assembly instructions
- Price is dependent on material
- All parts notched so after base plates are installed there is no need for a tape measure!

Pergola

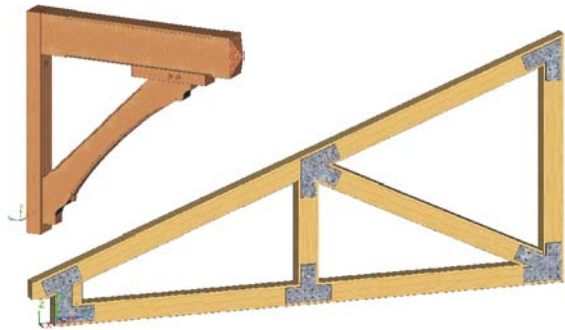

Precision End Trim:

- Full lifts cut to millimeter precision
- Up to 60' lengths can be cut
- Floor joists and rafters cut on CNC machine
- Layouts for complicated roofs
 - Rafters packaged by valley sets
 - Rafters labeled

Timber Trusses and Brackets:

- Shipped as a kit or assembled
- Metal plate, hidden fasteners or wooden pegs
- Price dependent on material, size, and style
- Timber, Glulam, or Versalam

Miscellaneous Prefabrication:

- Gazebo, Baseball Dugout, or whatever we can design for you.
- If we can ship it, we can build it.
- Ask us to quote your next project.

Gazebo

Floor and Roof Panels:

- Pre-assembled and shipped to site
- Labeled placement plan
- Quicker build times
- No waste materials to discard

With a combination of on-site custom fabrication and shop prefabrication experience, our staff has the practical knowledge about what it takes to keep your project on track. We anticipate issues and provide fast, innovative solutions, eliminating costly problems on-site.

Our designers use advanced software and our manufacturing process implements the latest construction techniques. Demonstrating our commitment to accuracy and efficiency, our state-of-the-art manufacturing facility uses equipment from MiTek, Holtec, Virtek, Monet DeSaw, and Hundegger.

Call us today to discuss your project.
